

Wrap up from JAXA point of view (1/2)

●Programmatic

- To accelerate or at least keep the current LRD of the core observatory (June 2013)

●Space segment

- To actively encourage and involve partners which have the microwave sounder, and new partners
 - ✓METOP (EUMETSAT) , FY-3 (China), EGPM?

●Ground segment

- Further encourage near-real time data collection and processing of the constellation satellites for operational data use
 - ✓Microwave sounder data, Brazil GPM, Mega-tropique

Wrap up from JAXA point of view (2/2)

- Science and application

- Encourage and solicit pre-GPM activities and preparation
- TRMM operation continuation is very important
- Present clear science goals and coordinate science activities within the GPM community
